

QUARANTENA -
 "forty days" used in the 14th-
 15th-century Venetian language,
 and designating the period
 that all ships were required to
 be isolated before passengers
 and crew could go ashore
 during the Black Plague epidemic.
 These sailors could not wait
 to get off the ship after endless
 long voyages! - Sometimes when I
 am desperately under-stimulated
 and bored during these Co-Vid19
 days I think about my fellow
 pirates all stranded on different
 islands and I smile because they
 all have special unique talents and
 when the time is right we will
 storm the seas and... what are
 your plans for AFTER? Don't forget
 to take time out and opt to daydream
 and get educated but also do nothing
 because this system wants us to be
 productive all the time and look
 where it got us - Be well ☺
 -MARTIN
